

## Aqua Sierra Controls is a process controls system integrator and licensed contractor that provides the following services:

- Process control instrumentation service, troubleshooting, repair, installations and calibrations including analytical devices using NIST traceable test equipment and test procedures. **24/7 emergency service**
- MCC, electrical and process control panel troubleshooting, rewiring and/or replacement.
- PLC and HMI equipment, installation and programming services for all major PLC manufacturers. Allen Bradley, Modicon, Idec, DFS, Koyo and many more.
- Technical labor assistance for plant shut downs and outages for cogeneration, chemical and industrial manufacturing.
- Instrumentation and calibration services for industrial process flow, pressure and temperature including mass flow. We provide AMS2750D calibration methods and procedures for temperature processes.
- Industrial effluent process wastewater flow and sampling station equipment and service for open channel or closed pipe systems, including storm water systems.
- SCADA for in-plant control or remote telemetry, licensed radio, spread-spectrum, fiber-optic or hardwire using state-of-the-art PLCs and telemetry equipment.
- Chemical feed equipment including design, installation and repair for: gas or liquid feed systems for injection of CL<sub>2</sub>, SO<sub>2</sub>, acid and caustic for pH and ammonia.
- A comprehensive UL508 panel shop for motor controls and PLC control panels. Shop repair facility for electronic, pneumatic and electromechanical instrumentation.
- Licensed contractor with design build capability for turnkey projects: conveyor systems, pump and motor controls, wastewater pretreatment systems and instrument processes, including AutoCad services.
